

FOR IVD MANUFACTURERS & DISTRIBUTORS

Your analysers. Our connected layer. *Your margin.*

Your analysers are strong at the bench. But tenders now ask for connectivity and a data layer you do not build: results into the customer's record, quality control, reporting, audit evidence. Losing on that line costs the whole deal.

Catenix is the connected software layer that carries your devices into a clinic's record: vendor-neutral connectivity into any LIS or EHR, plus the full clinic platform, white-labelled or co-branded, deployed in your customers' clinics, with recurring revenue at your margin.

WHAT YOU CAN PUT YOUR NAME ON

01 CONNECT

Turnkey connectivity

A small on-site gateway captures results over HL7, POCT1-A2 and ASTM and forwards them into any LIS or EHR. Protocol

02 PLATFORM

A clinic platform to resell

The whole visit runs on Catenix: registration, results, QC, competency, reporting and billing. A product your

MOST SUPPORTED ANALYSERS
CONNECT WITHIN DAYS

Catenix does not interpret clinical results and provides no clinical decision support. Interpretation, validation and authorisation stay with the clinician.

CATENIX.COM

One gateway for the bench, *one platform to resell.*

A multi-vendor fleet in one view: devices from across the bench, each with its connection protocol, managed from the cloud without a site visit.

- Around 51 device families**
 Protocol support for analysers across HL7 v2, POCT1-A2 and ASTM. Vendor-neutral: your devices sit alongside the rest of the bench in one record.
- One gateway, most of the bench**
 A single self-healing on-site gateway captures results automatically and forwards them onward to any LIS, EHR or FHIR endpoint.
- White-label the whole platform**
 Your logo on the portal, your name on the reports and referral letters. Ship it as your product, or co-branded with Catenix.
- Per-tenant plans and metering**
 Each customer clinic is a tenant with its own plan and usage metering. The channel margin is set by you, per tenant.
- Co-branded reports and QC**
 Branded patient reports plus Levey-Jennings and Westgard QC, competency and a tamper-evident audit trail: the governance a tender asks for.
- Partner programme margin**
 Add recurring software revenue to every analyser you place. Onboarding, deal registration and support run through the partner programme.

A MODULAR PLATFORM YOUR CUSTOMERS GROW INTO

MODULAR MARKETPLACE

DATABASE-ENFORCED ISOLATION

A modular marketplace lets each clinic enable and pay for only the add-ons it uses. Each clinic is a tenant with database-enforced isolation: defence in depth at the database layer.

Partner with Catenix.

Send us your device list. We will map protocol support, agree white-label or co-brand, and set the channel margin in a 30-minute partner call.
